

Medical Terminology Homework

Student Name (in Arabic)

Student Number:

Class (Nursing or Laboratory Medicine):

Give a definition for the following medical terms:

Hepatotoxic:

Neurotoxic:

Hepatocyte:

Arthrology:

Intracerebral:

Intravenous administration:

Intraabdominal:

Endometritis:

Endoscopy:

Endoscope:

ectopic pregnancy:

interventricular:

intercostal:

Dextrocardia:

Retrocardial:

Pericarditis:

Periodontal tissues:

Periodontitis:

Epidermis:

Epicardium:

Epigastric:

Subcutaneous:

Hypoglycemia:

hypodermic needle:

Superior:

Inferior:

Lateral:

Medial:

Posterior:

Anterior:

Distal:

Proximal:

Anteroapical:

Anterolateral:

Anteroposterior x-ray:

Mesaortitis:

Anaesthesia:

analgesic drug:

antitoxin (antidote):

Antibiotics:

Antenatal:
postoperative complication:
Nocturia:
Prophylaxis:
Pathology:
Neurpathy:
Myelopathy:
Ophthalmopathy:
Lymphadenopathy:
Dysphagia:
macrophage
phagocytic cell:
encephalopathy:
Malodorous:
Malnutrition:
Malformation:
Dermatitis:
Pericarditis:
Pseudomembranous colitis:
Neoplasm:
Adenoma:
Pyogenic bacteria:
Pyoarthritis:
Pyostomatitis:
Pyomyositis:
Febrile flu:
Osteomalacia:
Hematemesis:
antiemetic drugs:
panhysterectomy:
Macrocytes:
Microcardia:
Megacolon:
Pandemic:
Hydrophilic:
Hydrophobic:
Amphipathic:
Oophorectomy:
Cholecystectomy:
Lipoma:
Hyperlipidemia:
Hyperlipoproteinemia:
Lipase:
Glycolipids:
Glycoproteins:
Monotherapy:
bilateral mastectomy:
Diplococci:
Trisomy 21:
Quadriplegia:

The quadriceps muscle:
Hepavalent antitoxin:
Polynuritis:
multinucleated cell:
Oligosaccharide:
Oligoarthritis:
Polygeneic disorder:
Polysaccharide:
Tachycardia:
Bradycardia:
Hemiplegia:
Semiconscious:
Brain hemisphere:
Isoenzyme:
Leukocytes:
Rhodopsin:
Erythrocyte:
Cyanosis:
Melanoma:
Melanocytes:
Xanthoma:
Cirrhosis:
Organelle:
Plasmalemma:
Phospholipids:
Karyotype:
endoplasmic reticulum:
lipocytes:
osteoblasts:

Define the following planes:

1. Median plane (midsagittal):
2. Sagittal plane:
3. Horizontal (transverse) plane:
4. Cross-section or an axial plane:
5. Frontal (coronal) plane:

List the viscera (organs) that are found in the mediastinum.

Write the medical term(s) used for each of the following positions:

Position description	Medical term
Around, surrounding	
Above, outer	
Inside	
Outside	
Behind, before	
Under, low	
Between	
Left	
Middle	
Right	
In front	
In the side of	
Behind	

Write the medical term(s) used for each of the following descriptive words:

Description	Medical term
Terms describing negation	
Without or absence of	
Loss of or removal of	
Against	
Terms describing time	
Before	
After or following	
Night
